

## Public Comments

The City of Indianapolis held a public comment period from October 1, 2004 through October 31, 2004. One comment/question was received:

**Question:** The Consolidated Plan identifies housing surpluses for some income categories. Did the city consider the number of bedrooms per unit when conducting the housing market analysis?

**Response:** The city did consider the number of bedrooms. The city utilized data collected from the U.S. Department of Housing and Urban Development and the U.S. Census Bureau called 2000 CHAS Data. This information compares the number of bedrooms per unit to household size. Please refer to Table 2A in Appendix A of this Consolidated Plan.
