Sec. 731-221. Special regulations.

(a) Minimum setback lines and yards. Front yards, having a minimum depth in accordance with the following setback requirements, shall be provided along all public street right-of-way lines, and the minimum required building setback lines shall be as follows:

(1) Expressway, parkway or primary thoroughfare (as designated on The Official Thoroughfare Plan of Marion County, Indiana). No part of any structure (except an open porch or eave or cornice overhang not exceeding two (2) feet) shall be built closer than forty (40) feet to any proposed right-of-way line of an expressway, parkway or primary thoroughfare. In the case where a proposed right-of-way line does not exist, the existing right-of-way line shall be used for the setback measurement.

(2) Secondary thoroughfare (as designated on The Official Thoroughfare Plan of Marion County, Indiana). No part of any structure (except an open porch or eave or cornice overhang not exceeding two (2) feet) shall be built closer than thirty (30) feet to any proposed right-of-way line of a secondary thoroughfare. In the case where a proposed right-of-way line does not exist, the existing right-of-way line shall be used for the setback measurement.

(3) Collector street. No part of any structure (except an open porch or eave or cornice overhang not exceeding two (2) feet) shall be built closer than thirty (30) feet to any existing right-of-way line, or sixty (60) feet from the centerline, of a collector street, whichever is greater.

(4) Local street, marginal access street or cul-de-sac.
   a. No part of any structure (except an open porch or eave or cornice overhang not exceeding two (2) feet) shall be built closer than twenty-five (25) feet to any existing right-of-way line of a local street, marginal access street or cul-de-sac, with the exception of the vehicular turnaround thereof.
   b. No part of any structure (except an open porch or eave or cornice overhang not exceeding two (2) feet) shall be built closer than twenty (20) feet to any existing right-of-way line of the vehicular turnaround of a cul-de-sac.

(b) Attached multifamily dwelling projects, single-family cluster dwelling projects and mobile dwelling projects; site plan requirement to Improvement Location Permit issuance.

Prior to Improvement Location Permit issuance for any building or structure within an attached multifamily dwelling project, single-family cluster dwelling project, or mobile dwelling project, three (3) copies of the site and landscape plans for the entire project shall be filed with the bureau of license and permit services of the department of code enforcement. Also, for an attached multifamily dwelling project, the site and landscape plans shall include a delineation of the proposed major livability space.

(G.O. 96, 2009)

(c) Street requirements.

(1) Clear sight triangular area. The following provisions shall apply to all streets, interior access drives or interior access driveways, whether public or private: All landscape plantings, structural barriers, shrubs, trees, structures or other objects, temporary or permanent, shall permit completely unobstructed vision within a clear sight triangular area between the heights of two and one-half (2 1/2) and nine (9) feet above the crown of the
streets, drives, or driveways. A clear sight triangular area shall be established as one of the following (See section 731-102, Diagram F):

a. On a corner lot, the clear sight triangular area is formed by the street right-of-way lines, the pavement edge of the drives or driveways and the line connecting points twenty-five (25) feet from the intersection of such street right-of-way lines and pavement edge lines; or in the case of a round or cut property corner, from the intersection of the street right-of-way lines and pavement edge lines extended; or,

b. On a lot adjacent to an at-grade railroad crossing, the clear sight triangular area is formed by the lot line coterminous with the railroad right-of-way, the street right-of-way line or pavement edge line, and the line connecting points twenty-five (25) feet from the intersection of such lines; and,

c. On a lot that has a driveway, abuts an alley or that is next to a lot that has a driveway, the two (2) clear sight triangular areas are formed by the street right-of-way line, both sides of either the alley right-of-way or of the surface edge of the driveway, and the line connecting points ten (10) feet from the intersection of the street right-of-way and driveway or alley lines extended.

(2) Requirements for public streets.

a. All public streets shall be dedicated to the public and improved and constructed in accordance with the standards set forth in the Subdivision Control Ordinance of Marion County, Indiana, and General Ordinance No. 49, 1972, including the Indianapolis Department of Public Works Standards for Street and Bridge Design and Construction.

b. The right-of-way of all streets within the project, which are indicated on The Official Thoroughfare Plan for Marion County, Indiana, or which have been required by zoning, variance, or platting commitment, condition, covenant or parole covenant, to be constructed to specific standards based upon their proposed functional classification shall be dedicated to the public, or the right-of-way thereof shall be reserved for the future.

(3) Requirements for all private streets, interior access driveways, and interior access drives for attached multifamily dwelling projects, mobile dwelling projects and planned unit residential developments.

a. All private streets, interior access driveways and interior access drives for attached multifamily projects, mobile dwelling projects and planned unit residential developments shall meet the minimum standards for construction, materials for use in construction, and design as specified by the "Standard Specifications," Indiana Department of Transportation (8-17-1-39), the Indiana Department of Transportation Supplemental Specifications, and the Indianapolis department of public works (DPW) Standards for Street and Bridge Design and Construction. In the event DPW specifications conflict with the Indiana Department of Transportation "Standard Specifications," the most stringent specifications shall govern.

The "Standard Specifications" of the Indiana Department of Transportation is incorporated into this ordinance by reference. Two (2) copies of the "Standard Specifications" are on file and available for public inspection in the office of the Division of Development Services.

Provided, however, that the standard specifications incorporated into this ordinance shall be modified as follows:
1. Curbing shall not be required in the development of private streets, private access driveways and private interior access drives for attached multifamily projects.

2. Private interior streets, private interior access drives and private interior access driveways for attached multifamily projects, mobile dwelling projects and planned unit residential developments shall have a minimum width, including gutters, and, if required, curbing, of:
   - One-way, no parking: Twelve (12) feet.
   - One-way, parking on one (1) side of the street only: Twenty (20) feet.
   - Two-way, no parking: Twenty (20) feet.
   - Two-way, parking on one (1) side only: Twenty-seven (27) feet.
   - Two-way, parking on both sides of the street: Thirty-six (36) feet.

b. Private streets, private interior access drives and private interior access driveways shall be privately maintained (not by governmental agencies) in good condition and free of chuckholes, standing water, weeds, dirt, trash and debris.

c. The owner or project management, homeowners' association or other similar organization shall maintain all sidewalks, pedestrian ways, private streets, interior access drives, interior access driveways and parking areas in good repair and reasonably free of chuckholes, standing water, mud, ice and snow.

(4) Sidewalk Requirements in the D-6, D-6II, D-7, D-8 (Multi-Family Lots), D-9, and D-10 Dwelling Districts. On any lot or project that is not served by either an existing public sidewalk or a public sidewalk alternative authorized by the City of Indianapolis, sidewalks shall be provided in compliance with the following regulations.

a. Placement.

   1. Sidewalks shall be provided along all eligible public streets, excepting interstate, expressway, freeway, as indicated in the current Official Thoroughfare Plan for Marion County, Indiana, and other full control of access frontages as determined by the Administrator.

   2. Sidewalks shall extend along the full length of the eligible public street.

   3. Unless a different location is approved by the Administrator, the sidewalks shall be provided within the public right-of-way, one (1) foot from the right-of-way line.

   4. Where sidewalks exist in the public right-of-way in front of an adjacent lot and extend to a point equal to the common lot line extended, the sidewalks shall fully connect with such existing sidewalks on the adjacent property to provide a continuous, unobstructed walkway along the public street.

b. Construction.

   1. Sidewalks shall consist of the walkway and any curb ramps or blended transitions.

   2. Sidewalks shall meet the Standards for Street and Bridge Design and Construction (G.O. 49, 1972/Standards for Acceptance of Streets and Bridges of the City-County Council of Indianapolis and Marion County, Indiana), as amended.

   3. Sidewalks constructed to comply with this section shall be a minimum width of five (5) feet, exclusive of the width of any curb. A minimum clear width of four (4) feet shall be provided. The clear width shall be fully unobstructed by utility poles, traffic signs, mailboxes, fire hydrants or other similar items.
4. **Sidewalks shall be a minimum of four (4) inches in thickness of Portland cement concrete, except where sidewalks cross concrete drives or driveways the thickness shall be a minimum of six (6) inches, conforming to subsection 604 of the current Indiana Department Of Transportation Design Standards and Specifications.** Sidewalks along eligible public streets that are identified in the Marion County Greenways Plan, Marion County Comprehensive Plan, or IndyParks Connectivity Plan as a greenway or linear path may be constructed with alternate materials and depth standards as approved by the Administrator.

c. **Site Considerations.** In locations where site conditions cause extreme difficulty in the construction of sidewalks, the Administrator may, upon written request, waive that portion of sidewalks or reduce the five (5) foot minimum sidewalk to not less than four (4) feet. Examples of extreme difficulty include, but are not limited to, waterway crossings, significant elevation change, existing deep drainage swales in the right-of-way, side slope grades steeper than 3:1, and linear grade changes along the right-of-way line in excess of 7%. The request shall include supporting documentation. The waiver would be pursuant to a written agreement and subject to a contribution in lieu of sidewalks that shall be made to the City for the provision of sidewalks in Marion County. The amount shall be $18 per linear foot of required sidewalk waived. The rate per linear foot shall be increased by $0.45 annually beginning January 1, 2009.

d. **Compliance with the Americans with Disabilities Act (ADA).** Sidewalks and any alternative pedestrian walkway shall comply with the Americans with Disabilities Act. Where this ordinance exceeds the Americans with Disabilities Act, any such improvement shall meet or exceed the provision of this ordinance.

e. **Requirements for sidewalks for new development.** Sidewalks shall be provided in connection with the initial development of a project when a building is constructed, erected, or relocated. Sidewalks shall be provided for the reconstruction of a project upon which at least 2/3 of all buildings have been removed, demolished, or destroyed.

f. **Internal accessibility for new development.** Within a project, walkways shall be provided in accordance with a pedestrian plan that shall include a walkway system that functionally connects all of the building’s main front entrances with the sidewalk located along the public right-of-way of each of the project’s eligible public streets. The walkways may be constructed of asphalt, concrete, pavers, or other materials meeting the Fair Housing Act of 1988 and ADA guidelines. Such private walkways shall provide for identifiable pedestrian crossing treatments along functional pedestrian routes wherever the private walkways cross an interior access drive or interior access driveway. Such internal accessibility shall be (i) subject to the Site Considerations provisions as provided in paragraph c. above, but without any contribution obligation, and (ii) subject to and in accordance with the requirements of the Fair Housing Act of 1988 and ADA.

g. **Requirements for sidewalks for redevelopment or additions.** For a lot or project upon which a building or a permanent foundation exists prior to July 1, 2008, and additional improvements are proposed, sidewalks for the redevelopment or the additions shall be provided in compliance with the following regulations, provided however, in the event of a project with more than 2/3 of its units being complete as of July 1, 2008, the provisions of this ordinance shall not be applicable to all phases of the project:

   1. Sidewalks shall be required when a building is constructed, converted to a residential use, erected, enlarged, extended, reconstructed or relocated; except where a building was destroyed or damaged by fire or natural causes or where a
building is being rehabilitated and such reconstruction or rehabilitation is on substantially the same foundation and of substantially the same gross floor area.

2. Sidewalks shall be provided at a minimum rate of 5 linear feet of sidewalk per 100 square feet or fraction thereof of the gross floor area of the constructed, converted to a residential use, erected, enlarged, extended, reconstructed or relocated building or addition. The linear amount of sidewalk required shall not exceed the cumulative length of eligible public streets of the project, excepting interstate, expressway, freeway, as indicated in the current Official Thoroughfare Plan for Marion County, Indiana, and other full control of access frontages as determined by the Administrator.

3. The provision of the sidewalks shall be in accordance with the following options with the first option being preferred:
   i. Sidewalks shall be constructed; or
   ii. Pursuant to a written agreement, a contribution in lieu of sidewalks shall be made to the City for the provision of sidewalks in Marion County. The amount shall be $18 per linear foot of required sidewalk. The rate per linear foot shall be increased by $0.45 annually beginning January 1, 2009.

4. Where this subsection would result in the partial installation of sidewalks along an eligible public street, the Administrator shall determine the location along the eligible public street where the sidewalks shall be installed. The criteria for the sidewalk location shall be the greatest improvement to the public health, safety, welfare and convenience.

5. The provision of the sidewalks shall be required for each addition to the site until the sidewalk is constructed along all eligible public streets or the equivalent contribution has been made for the sidewalks.

(G.O. 4, 2008, § 4-14-08)

(d) Reserved.

(e) Off-street parking requirements. Off-street parking facilities shall be provided and maintained, for all uses permitted in the dwelling districts, in accordance with the following regulations:

(1) Number of spaces required.
   a. For every single-family dwelling or two-family dwelling in the D-A, D-S, D-1, D-2, D-3, D-4, D-5, D-5II, D-8, and D-12 dwelling districts, there shall be provided at least two (2) off-street parking spaces for each unit that may include the parking space(s) provided in a garage or carport.
   b. For every attached multifamily dwelling in the D-6, D-6II, D-7, D-8, D-9 and D-10 dwelling districts, off-street parking spaces shall be provided in accordance with the development amenities of each district.
   c. For every mobile dwelling in the D-11 dwelling district, a minimum of two (2) paved off-street parking spaces shall be provided.

(2) Development requirements.
   a. Parking areas for uses in (1)a. above need not be paved.
   b. Parking areas for uses in (1)b. above shall be subject to the following requirements:
      1. Off-street parking areas (including, but not limited to, entrances, exits, aisles, spaces, traffic circulation and maneuverability) shall be designed and constructed at not less than the recommended specifications contained in [additional specifications]
"Architectural Graphic Standards," Current Edition, Ramsey and Sleeper, John Wiley and Sons, Inc., New York, New York (a copy of which is on file in the offices of the Division of Planning and is hereby incorporated by reference and made a part hereof); except that each parking space shall have, regardless of angle of parking, a usable parking space measuring not less than eight and one-half (8 1/2) feet in width (measured perpendicularly from the sides of the parking space) and at least one hundred fifty (150) square feet of usable parking area.

2. The parking area shall not be used for permanent storage or the display, advertisement, sale, repair, dismantling or wrecking of any vehicle, equipment or materials.

3. Parking areas shall be paved with bricks, concrete or improved with a compacted aggregate base and surfaced with an asphaltic pavement, to adequately provide a durable and dustfree surface. Parking areas shall be maintained in good condition and free of chuckholes, weeds, dirt, trash and debris.

4. The surface shall be graded and drained in such a manner that there will be no free flow of water onto sidewalks.

5. The parking area shall have each space delineated by painted lines and shall be provided with curbs, bumper guards or wheel stops so located that no part of the parked vehicles will extend beyond the boundary of the established parking area.

(f) Screening, landscaping, lighting and grounds maintenance. Screening, landscaping, lighting and grounds maintenance shall be provided and maintained, for all attached multifamily dwelling projects and all mobile dwelling projects, in accordance with the required landscape plans and with the following regulations:

(1) Screening:

a. Front yard of the project: An ornamental, decorative fence or masonry wall, not more than forty-two (42) inches in height if solid, or six (6) feet if the sight barrier is less than fifty (50) percent, may be used in conjunction with the required landscaping. Chain link fencing is not permitted. A clear sight triangular area shall also be maintained as regulated in section 731-219(b)(2)c. of this ordinance.

b. Side and rear yard of the project: An ornamental, decorative fence or masonry wall may be used in conjunction with the required landscaping. Chainlink fencing is permitted provided it is black vinyl covered chainlink and does not include slats. A clear sight triangular area shall also be maintained as regulated in section 731-219(b)(2)c. of this ordinance.

Provided, however, if any portion of a mobile dwelling project or a multifamily project abuts land zoned so as to permit single-family or two-family dwellings, the perimeter yard between the project and the district shall be screened and landscaped for the purpose of buffering. In addition to the landscape requirements of section 731-221(f)(2), screening shall be provided and maintained according to the following minimum requirements:

1. Screening shall include any combination of an earthen mound; a solid hedge; a wall or fence of ornamental block, stone, brick, or solid wood fencing; and,

2. Effective screening height shall be at least six (6) feet, as measured from the parking area's grade level, and so constructed to prohibit any view therethrough; and,
3. If fencing is used for screening, such fencing shall be completely opaque when viewed within fifteen (15) degrees of perpendicular to the fence; and,

4. If an earthen mound is used for screening, such earthen mound shall not exceed a maximum height of four (4) feet above grade and the incline shall not exceed a three (3) to one (1) ratio, with the exception of previously existing natural outcroppings.

c. Trash containers. All trash containers exceeding six (6) cubic feet shall:

1. Be completely screened within a solid walled or fenced stall equipped with a self-latching solid gate and buffered by landscaping; and,

2. Be accessible only from an interior access drive of the project; and,

3. Not be located in any required perimeter yard.

(2) Landscaping:

a. All required perimeter yards shall be landscaped. The landscaping of these yards shall, at a minimum, consist of a combination of living vegetation, such as trees, shrubs, grasses or ground cover materials, planted or transplanted and maintained, or preserved as existing natural vegetation areas (e.g., woods or thickets). Loose stone, rock or gravel may be used as a landscaping accent, but shall be limited to only twenty (20) percent of the area of the required yard in which it is used.

b. Within the perimeter yards, there shall be at least one (1) tree planted or maintained for every thirty (30) feet of total linear distance along all perimeter yard property lines. Required trees may be grouped together in the perimeter yard, however, in no case shall spacing between said trees exceed sixty (60) feet on center. (Refer to Diagram E.)

c. All parking areas adjacent to required perimeter yards shall be screened along the perimeter yard with a solid hedge. Screening may include the combination of said solid hedge and earthen mound, provided the effective screening height shall be at least thirty-six (36) inches above the parking area’s grade level at the time of planting and the maximum incline of the earthen mound shall not exceed a three (3) to one (1) ratio with the exception of previously existing, naturally occurring outcroppings.

d. Within mobile dwelling projects, at a minimum, one (1) tree shall be planted or maintained on every mobile dwelling site. Said required tree shall not be located within any required yard or common recreational area(s).

e. Required trees shall be deciduous or evergreen with a spreading branch habit. A group of shrubs may be substituted for a required tree, provided however:

1. That the proposed tree to be substituted is not an existing tree, and

2. That no more than twenty (20) percent of the required trees are substituted with shrubs, and

3. That the shrubs are planted or maintained five (5) feet or less on center, and

4. The shrubs substituted are in addition to any underplanting requirements, and

5. That a grouping of five (5) shrubs may be substituted for one (1) tree.

f. The minimum size of all required landscape plant materials, at the time of planting, including substituting or replacement trees and shrubs, shall be as follows:
1. Deciduous shade (overstory) trees: Two and one-half (2 1/2) inch caliper at six (6) inches above the ground.

2. Deciduous ornamental (understory) trees: One and one-half (1 1/2) inch caliper at six (6) inches above the ground.

5. Deciduous shrubs: Twenty-four-inch spread or two (2) feet in height.

6. Evergreen shrubs: Twenty-four-inch spread or two (2) feet in height.

g. Deciduous and evergreen shrubs when used for required hedges shall be planted an average of thirty-six (36) inches or less on center within the hedge row.

h. All trees and shrubs shall be planted, maintained or transplanted in accordance with the standards of the American Association of Nurserymen (a copy of which is on file in the Office of the Division of Planning and is hereby incorporated by reference and made a part hereof). All trees and shrubs shall be mulched and maintained to give a clean and weedfree appearance.

i. Prior to any construction activity, the removal from any minimum, required yard of any existing deciduous tree over three-inch caliper at six (6) inches above ground or of any existing shrub or evergreen tree over six (6) feet in height, must first be approved in writing by the Administrator. Removal of said tree(s) without written approval from the Administrator, shall require the replanting of replacement tree(s) so that the total number of caliper inches replanted equals or exceeds the total number of calipers removed. Replacement trees shall be of the same species as those trees removed unless approved otherwise by the Administrator. Replanting of these replacement trees shall occur within six (6) months of removal or the next planting season, whichever occurs first. Replacement trees shall not be considered a required tree for the figuring of the minimum number of trees required in any perimeter yard but rather as an additional tree.

j. All existing trees larger than ten-inch caliper at six (6) inches above the ground that are to be preserved shall be maintained without injury and with sufficient area for the root system to sustain the tree. Protective care and physical restraint barriers, such as temporary protective fencing, shall be provided to prevent alteration, compaction or increased depth of the soil in the root system area prior to and during groundwork and construction. Heavy equipment traffic and storage of construction equipment or materials of any kind shall not be any closer to the tree than the drip line of the tree or ten (10) feet, whichever is closer.

k. Prior to the issuance of an Improvement Location Permit, the Administrator may require a tree survey for a specified time to be completed for a site or portion of a site. Such survey shall become a part of the file and requirements for an Improvement Location Permit. In the case of large, dense tree stands (those exceeding six hundred (600) square feet in area with seventy-five (75) percent branch coverage of the ground surface), the outer boundary of the tree stands’ drip line and location with a listing of the predominant species and caliper size may be substituted for a detailed inventory.

l. The Administrator, upon written request by the applicant and upon receiving a suitable alternative landscape plan, shall have the power to modify any landscape requirements deemed by the Administrator to be infeasible or unreasonably burdensome. Such modification shall be written and become a part of the file and requirements for the Improvement Location Permit.
(3) Landscape plan: A landscape plan shall:

a. Be drawn on a copy of the site plan (or a simplified scale drawing thereof) showing exact location, outlines and dimensions of all structures, buildings, mobile dwelling sites, mobile dwelling paved stands, patios, sidewalks and pedestrian ways, streets, trash enclosures, project access and interior access drives and driveways, individual and project storage, permanent lighting fixtures, signs, benches, screens, walls, fences, natural vegetation areas, open space, recreational areas, perimeter yards, adjacent property uses and physical features, and all underground and overhead lines with depths or heights indicated at intervals where lines change direction or where terminals or connections are provided; and,

b. Show dimensioned detailed elevation or section drawings of any trash enclosures, walls, fences, and signs (including sign content); and,

c. Show all existing elevations and proposed land contour lines having at two-foot intervals; and,

d. Show location and nature of existing and proposed drainage systems and their flow; and,

e. Include a tree survey indicating the exact location of existing trees of over two and one-half (2 1/2) inch caliper one (1) foot above the ground and all flowering trees, shrubs and evergreens; all being accurately labeled in the drawing as existing (to remain), existing to be removed or to be transplanted with species and caliper size indicated. Exception: those trees and shrubs located in natural vegetation areas (e.g., woods, thickets or meadows) that will not be developed, but will be left and maintained as a natural untouched area may be indicated by the delineation of the area's outer boundary; and,

f. Show all proposed plantings and transplantings with plants and plant groups labeled in the drawing as to quality, species, shape, size, spacing (on centers), and purpose (visual or noise abatement screen, hedge, specimen or ground cover).

(4) Lighting:

a. All access drives, interior streets, interior access drives, intersections, dead ends, culs-de-sac, apices of curves, parking areas, open storage areas, walks and passive and active recreation areas shall be provided with lighting devices to adequately illuminate the areas.

b. Street or pedestrian lighting devices may be mounted at heights beginning at (or slightly below) ground level to forty-two (42) inches above ground or from ten (10) to thirty (30) feet above ground. Spacing of all lighting devices shall be determined by the height above street grade level and maximum footcandles of each device in conjunction with their capacity to provide an adequate lighting level for the required area and use.

c. Lighting levels for all outdoor areas shall meet the recommended minimum average maintained horizontal footcandle as specified in the "Illuminating Engineering Society Lighting Handbook," Application Volume, current edition (a copy of which is on file in the Office of the Division of Planning and is hereby incorporated by reference and made a part hereof).
d. All lighting facilities used to illuminate outdoor areas shall be so located, shielded and directed upon the area to be lighted that they do not glare onto, or interfere with, street traffic, adjacent buildings, or adjacent uses.

e. Lighting devices for active recreational areas and uses shall be equipped with switching devices that allow lighting levels to be changed when the active recreational use ceases and a lower lighting level is sufficient.

(5) Grounds maintenance. The project owner or management, homeowners' association or other similar organization shall:

a. Maintain the entire site in a safe, neat and clean condition; free from litter, trash, debris, junk, and reasonably free of weeds; and,

b. Maintain all sidewalks, pedestrian ways, interior streets, interior access drives, and parking areas in good repair and reasonably free of chuckholes, standing water, mud, ice and snow; and,

c. Maintain the landscaping by keeping lawns mowed, all plants properly pruned and maintained as disease-free, and planting beds groomed, except in naturally occurring vegetation areas, such as thickets; and,

d. Replace any required planting(s), which are removed or no longer living, within a year or the first planting season, whichever occurs first, except those in naturally occurring vegetation areas, such as thickets.

(g) Appeal. In all subsections of this section 731-221, Special regulations, where the Administrator is given authority of discretionary approval of plans and specifications, or the method or manner of qualification, or any other similar authority, any party of interest shall have the right to bring such action by the Administrator before the Metropolitan Development Commission for its review and approval or disapproval through the filing of an approval petition for a detailed plan approval. The right to have such action of the Administrator reviewed by the Metropolitan Development Commission shall be in addition to any other right an aggrieved party may have under law to have such action reviewed, including, but not limited to, the right to appeal such action to the Metropolitan Board of Zoning Appeals of Marion County, Indiana.

(h) Application of this section. This section shall be applicable to all dwelling districts except when specified otherwise in the Dwelling District Zoning Ordinance or in the D-P planned unit residential development district where subsections (a) and (e) shall not be applicable.
