CITY ANNOUNCES GREEN CCB DEVELOPMENT TEAM

Area professionals selected to participate in the Greening of the City County Building

INDIANAPOLIS – Thirty-five local professionals have been selected to serve on the Green CCB Development Team. The Greening of the City County Building, an initiative announced in April 2009 by Mayor Greg Ballard, will convert the Indianapolis-Marion County City County Building (CCB) into a greener, more sustainable structure.

Team members will work with the City’s Office of Sustainability, the Indianapolis-Marion County Building Authority and the Rocky Mountain Institute (RMI) – a national leader in sustainable design and energy retrofits that also led an initiative to green the White House by incorporating public participation.

“We want to engage citizens as much as possible in every step of this process to make the City County Building more energy efficient,” said Mayor Ballard. “Indianapolis is home to talented, creative professionals who have much to offer as we work to make this a more sustainable city, and the group we have assembled as our Green CCB Development Team represents that.”

Upon announcing the initiative, the City’s Office of Sustainability used public meetings and www.sustainindy.org to solicit applications from professionals in the green building sector who were interested in participating. Applicants were asked to provide information about their areas of expertise, relevant experience with green projects, ideas for ways to green the CCB, and ideas for innovative funding sources.

Eighty-nine applications were received representing business sectors ranging from architecture, construction and engineering firms to non-profits, universities and state agencies.

The Green CCB Development team will work with RMI on June 9-10 to develop a roadmap for how to transform the CCB into a green building, which will make the building more energy efficient, saving tax payer dollars.

-More-
The following are the individuals selected to comprise the Green CCB Team:

Amber Collins, Marion County Health Department
Andy Sahm, Shiel Sexton
Robert (Bob) Koester, Ball State University CAP
Brad Allen, Trane
Carey Hamilton, Indiana Recycling Coalition
Chris Downs, Johnson Controls
Craig Flandermeyer, Schmidt Associates
Dan Overby, BDMD Associates
Geoffrey Kavulya, Ratio Architects
Glenn Livers, IPL
Greg Silcox, ReThink
Jason Ellis, Keystone Construction
Jeff Kingsbury, Greenstreet
Jeff Mader, Synthesis
Jeff Ton, Confluence Dynamics LLC
Jennifer Roberts, Elements Engineering
Jill Mendoza, IDO
Kristen Trovillion, IN Office of Energy & Defense
Kurt Geisselman, Siemens
Luke Leising, American Structurepoint
Mark Darrall, A2SO4
Mark Grant, Ice Miller
Mary Hauser, Browning Investments
Mike Campbell, Hilton Garden Inn
Nicole Ross, Exact Target
Ryan Brown, Lauth
Sam Miller, JFNew
Sarah Hempstead, Energy Solutions
Stephen Ashkin, The Ashkin Group
Steven Robinson, URS
Ted Blahnik, Williams Creek Consulting
Tim Thoman, Performance Services Inc
Tom Durkin, Durkin and Villalta PE
Tom Roeder, DesignAire Engineering
Natalie Stuckey, Bose McKinney Evans
